The Problem

Today's trading solutions are mainly ineffective and expensive with outdated technology and poor customer service.

Lack of a one-stop cryptocurrency exchange platform.

Poor user interface discourages users from using the trading

Frequent downtimes have led to significant financial losses for crypto users. Korea's largest cryptocurrency exchange has been sued due to downtime as a result of an 800% surge in traffic during a Nov. 12Bitcoin Cash rally. During the several hours of downtime, the price of Bitcoin Cash plunged from \$2900 to \$1100.

Most crypto exchanges are bombarded by security breaches, making them vulnerable to hacks and huge thefts.

Inadequate infrastructure for a global payment system which caters to the requirements of both customers and their merchants.
